VOLUME 3, NUMBER 1.

LOS ALTOS, CALIFORNIA

SEPTEMBER 27, 1950

SAY, CHILDREN, DID YOU EVER WONDER WHERE MERRY-GO-ROUNDS CAME FROM?

Yes, believe it or not, some of our own neighbors are turning out merry-go-rounds and if you children will just ask your father to dig up a few thousand bucks, the Arrow Development Co. of Moffett Blvd. in Mountain View will whip up a dandy model for you. What size do you want? A 20 foot Merry-go-round with 20 jumping horses, two chariots and push button operation? Or do you have lots of neighborhood pals? Then maybe you need the 36 foot model with 30 horses and chariots (pictured at left)

It's not sure if Arrow Development can fill your order right away because they've been getting enquiries all the way from Canada to Mexico and have been kept busy making deliveries all over the United States.

Below, we got the four owners of Arrow Development to pose for us (and don't think that wasn't a job). From left to right, Angus Anderson of Holly Ave., Karl Bacon of Oakhurst Ave., Ed Morgan of Cherry Ave., and Bill Hardiman of University Ave.

Besides the Merry-go-round, these gentlemen also manufacture a kiddie auto ride, a kiddie boat ride, a kiddie sulky ride, and an aero ride. All of their rides incorporate many of their own special ideas which have not only simplified construction, but have also made each ride more durable, more economical to operate, and far safer.

Sorry, Junior, we didn't ask the men if they manufactured any gold rings for their merry-go-rounds. Maybe gone out of style.

a BIG difference!

Yes, there is a difference in HORSE MEAT...and there are several reasons why. We know the answers!

WERE WE RIGHT?

STRAIGHT SHOOTING

Many ask us about real estate values ... we sincerely believe now and next year will be the best time to buy real estate for some time to come. The present dip is comparable to the 1922-23 dip. Don't sell Los Altos short!
